Professional Profile

Analytical MSc Business Analytics student at Dublin City University with a strong foundation in Information Technology and practical experience within the regulated sports betting industry. Currently working at Paddy Power, developing real-world exposure to betting markets, customer behaviour, compliance, and operational risk management. Skilled in Excel, SQL, and Python for data analysis, reporting, and structured problem-solving. Strong interest in sports markets, probability, and data-driven pricing decisions in fast-paced environments.

Education

Master of Science (MSc) in Business Analytics – Dublin City University (2025–2026)

• Data Analytics & Visualisation

• Statistical Analysis & Business Decision-Making

• Database Management (SQL)

• Predictive Analytics & Business Intelligence

Bachelor of Business (Honours) in Information Technology – Technological University Dublin (2021–2025)

• Database Design & SQL Querying

• Advanced Excel & Business Reporting

• Object-Oriented Programming (Python)

• Information Systems Governance & Compliance

Technical & Analytical Skills

• Advanced Microsoft Excel (Pivot Tables, XLOOKUP/VLOOKUP, formulas, data cleaning, structured reporting)

• SQL (SELECT queries, JOINs, aggregations, filtering datasets)

• Python (object-oriented programming, structured logic, foundational data analysis)

• Data interpretation, trend identification, and performance evaluation

• Strong numerical accuracy and attention to detail

• Clear communication of data-driven insights

Professional Experience

Retail Betting Assistant – Paddy Power (Dec 2025–Present)

• Process high-volume betting transactions accurately in a fast-paced environment.

• Monitor betting activity and develop understanding of odds structures and customer wagering behaviour.

• Ensure compliance with gambling regulations and responsible betting standards.

• Identify and resolve transactional discrepancies to maintain operational continuity.

• Maintain vigilance for unusual betting patterns and escalate concerns appropriately.

Accommodation Assistant – Fota Island Resort (2022–2025)

• Managed workload efficiently during peak seasons in a high-performance environment.

• Reduced room turnaround time by 10 minutes through improved processes.

• Maintained 100% compliance with hygiene and quality standards.

• Contributed to a 15% increase in positive guest satisfaction reviews.

Academic Projects

Final Year Project – SmartCare System

• Designed and developed a structured IT solution addressing operational inefficiencies.

• Applied systematic testing and logical modelling techniques.

AI Applications Project (Team Leader)

• Led a team of four to develop AI-driven solutions to business challenges.

• Analysed datasets to identify patterns and present actionable insights.

Database & SQL Projects

• Designed relational databases and executed complex JOIN and aggregation queries.

• Extracted insights from structured datasets to support reporting and decisions.

Leadership & Achievements

• Peer Mentor – Supported over 10 first-year students transitioning to university life.

• HubSpot Digital Marketing Certification (2022).

• Volunteer – St. Vincent de Paul, supporting over 50 families.

• Certified First Aid Responder.

Interests

• Strong interest in sports markets, betting industry dynamics, and pricing strategy.

• Curious about how probability models inform odds setting and risk management.

• Member – DCU Postgraduate Society; Former Member – TU Dublin Women in STEM Society.

• Enjoy music exploration and baking.
